

Friends of Selsey Medical Centre

REGISTERED CHARITY NUMBER 1013645

A few examples of equipment which has been purchased for the medical centre:

Diabetic Retinopathy Camera

This means that the retinopathy service can hold clinics in Selsey and patients do not have to travel

ECG machines

These enable our patients to be checked at the surgery saving unnecessary trips to the hospital

Ambulatory Blood Pressure monitors

These enable patients to monitor their blood pressure at home, readings are then sent to the GP

Nebulisers

These are loaned to patients on a short term basis to help COPD patients at home

Having Friends of Selsey Medical Centre enables us to have a very well equipped surgery and allows us to offer services to our patients which we would otherwise not be able to provide. This means our patients can be looked after as much as possible without having to travel out of the village. Having access to this support also makes our service more attractive when we are trying to recruit in these difficult times.
